Subject: Response to Request Regarding ODOT Work on West Access Road

Mr. Blevins,

On March 6, 2006 you requested that USEC Inc. provide a response to the following:

1.) Please describe whether the proposed West Access road improvements being carried out by ODOT [Ohio Department of Transportation] were at the request of USEC Inc. for the proposed American Centrifuge Plant.

Accordingly, here is USEC Inc.'s response:

USEC Inc. did not request the proposed West Access road improvements. The ODOT did communicate the dates to USEC Inc. in advance to ensure that access to the plant was not interrupted and to allow time for access to be established via an alternate route (north access road). It is our understanding that this project is strictly a maintenance project based on their inspection records. ODOT inspects bridges annually and sets priorities for doing repair work based on conditions of pavement/bridges. This particular project was split up into pieces as re-pavement south of the cloverleaf took place two years ago and re-pavement north of the cloverleaf took place last year.

Sincerely,
Peter J. Miner
