REPLY TO
ATTN OF: RW-223

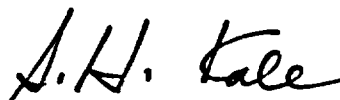

SUBJECT: Master Calendar

TO: Distribution

Attached is the current Master Calendar. Also attached is a Meeting Scheduling form for all OGR Meetings with the States and Indian Tribes; Transportation Coordinating Group; and MRS related meetings.

Please review this calendar and notify the Meeting Coordinator, M.J. Byrne, if you cancel or want to schedule/reschedule a meeting.

Thank you for your cooperation in implementing these procedures. Please call M.J. Byrne on (202) 586-5046 if you have any questions or comments.

Stephen H. Kale
Associate Director for
Geologic Repositories
Office of Civilian Radioactive
Waste Management

Reynolds Electrical & Engineering Co., Inc.

Post Office Box 98521 • Las Vegas, NV 89193-8521

IN REPLY REFER TO:

PERSONNEL RADIATION EXPOSURE REPORT FOR DOSIMETERS PROCESSED DURING THE PERIOD SEPTEMBER 9, 1987 THRU NOVEMBER 5, 1987

Reynolds Electrical & Engineering Co., Inc. (REEC) is a prime contractor to the Nevada Operations Office of the Department of Energy (DOE, formerly ERDA and AEC), and has been designated by DOE as the principal organization to provide personnel radiation dosimetry services.

Organization codes are established by the Dosimetry Section of the Environmental Sciences Department and are used to identify NTS workers according to the organizations requesting badging of the individuals. Personnel entering the NTS are assigned to these specific organization codes by the NTS Security Badge Office. Therefore, names appearing on the personnel radiation exposure reports under your organization listing are individuals for whom your organization has requested access to the Nevada Test Site. In some cases these persons may not be your employees.

Whole body external exposures from beta, gamma, and X-rays, are determined by thermoluminescent dosimeters. Minimum reportable doses are 15 mrem deep and 15 mrem shallow. Fast neutron doses (above 0.8MeV) are determined from the TLD albedo dosimeter. The minimum reportable dose is 50 mrem.

Whole-body or organ internal doses are determined from analyses of body excreta or from In-Situ counting results. Exposure to body parts and organs such as the extremities, eyes, or thyroid will be indicated by code letters as stated in the legend of the report; and respective doses will be listed in the appropriate column.

Due to computer problems experienced early in the year, the majority of first quarter dosimetry results have not been entered onto the dosimetry database (second quarter dosimeters were routinely processed). These results will be available on the next "Personnel Radiation Dosimeter Report". However, all dosimeters received to date have been evaluated and all confirmed first quarter positive doses (greater than the minimum reportable dose) have been manually entered and routinely reported in the enclosed report and the "Positive Dose Report".

If you have any questions, contact the Dosimetry Supervisor at 702/295-6206.

Billy P. Smith, Manager
Environmental Sciences Department
