Mail Control No. 138115

RE: Southern Virginia Regional Medical Center

The following additional information is being provided as requested in your e-mail of 3/30/06 regarding our license renewal.

You have not requested to continue use of 10 CFR 31.11 (a) materials (currently listed on your license.

Please identify which one of the following applies:

These materials have never been possessed at our facility and after discussing this with the RSO and administration we would like to withdraw this request from our renewal.

Please provide a description of adjacent areas, including those above and below, for each area or room where byproduct material is prepared, used or stored.

The nuclear medicine facilities are located in a section of the building which is single story so there is no occupancy either above or below these facilities. See Diagram attached for occupancy.

Sincerely

Pamela W. Low R.T.
Director of Imaging
