☐
RAS No. 11581

Re: Early Site Permit (North Anna Nuclear Plant in Mineral Virginia) for Dominion
Power

To whom it may concern:

I am opposed to nuclear power in general primarily because of the hazards involved in disposal of the irradiated fuel generated by reactor. In addition, the consequences should there be a problem are tremendous with operation and should not be overlooked. There are a number of other issues that I consider to be problematic at Lake Anna; such as the impact on the water levels, the temperature, the fish population, wetlands and other aquatic ecosystems, and safety concerns relative to recreational usage of the Lake.

I am sorry that Dominion seems to only want to provide energy from coal and nuclear power. I would like to see them promote other renewal energy sources such as solar, wind, etc. Disposal of the waste product generated by nuclear power should be enough to make use of this power source only as a last resort.

Sincerely,

Cathy Douthit
