Re: License No. 31-30666-01

Topic: Deliver to vans of Digirad Imaging Solutions, Inc.

Dear Penny,

In your absence, I have been discussing with your Acting Chief, Mr. Randolph Ragland, the favorable response received from the OGC regarding delivery of radioactive materials to our vans. Based on our telephone discussions, the following is my understanding of this matter:

Digirad Imaging Solutions, Inc. (DIS) may arrange to have radioactive materials delivered to our vans located at client sites, provided that the radioactive materials are received and secured by trained DIS personnel.

Please note that we received an email from Pamela Henderson on 11/18/05 that says: "Except as specifically authorized by the Commission in writing, no interpretation of the meaning of the regulations by any officer or employee of the Commission other than a written interpretation by the General Counsel will be recognized to be binding upon the Commission". Mr. Ragland informed us that in this case, a letter from the OGC or NMSS concerning the van delivery is not necessary. Please let me know immediately if that is not the case.
