

71-0102

June 8, 2006

ATTN: Document Control Desk  
Director, Spent Fuel Project Office  
Office of Nuclear Material Safety and Safeguards  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

Dear Sir,

In accordance with 10 CFR Part 71, Source Production and Equipment Company, Inc. (SPEC) is hereby requesting timely renewal of our Quality Assurance Program. The approval number is 0102.

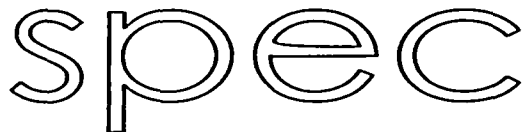

The only change that we would like to make to our Quality Assurance Program at this time is to revise the Quality Policy section to add our conformance with the applicable requirements of 10 CFR Part 21.

Sincerely,

Kelley Richardt  
Regulatory and Quality Manager

Enclosure: Revision 6 of SPEC's Quality Policy

4MSS01

## Quality Assurance Program

<u>Section</u>	<u>Page</u>	<u>Approval</u>	<u>Date</u>	<u>Revision</u>
Quality Policy	1 of 1	<i>[Signature]</i>	6/6/06	6

Source Production and Equipment Company (SPEC) has developed and maintains a quality system applicable to all items important to safety in accordance with the requirements of 10 CFR, Part 71, Subpart H. SPEC's quality system requires conformance with the applicable requirements of 10 CFR Part 21. It is SPEC's policy that work on radioactive material packages be accomplished in accordance with this quality system as described in the QA Program and implemented in the Quality System Procedure Manual (QSPM), Work Instructions and engineering documents.

The Senior Quality Management Council (SQMC) is responsible for establishing quality policy and regularly assessing the scope, status, implementation, suitability and effectiveness of the QA Program. The President presides over the SQMC.

Senior Management has the authority to revise the provisions of the QSPM.

Senior Management has delegated authority to Quality Assurance Management for implementing, maintaining and continually improving the quality system.
