

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

03221

315485

Licensee

1. Sharon L. Long Consulting

2. 1296 Russell Drive
Bolivar, OH 44612

In accordance with application dated

May 22, 2006,

3. License number 34-26655-02 is **amended** in its entirety to read as follows:

4. Expiration date September 30, 2015

5. Docket No. 030-35067

Reference No.

6. Byproduct, source, and/or special nuclear material

7. Chemical and/or physical form

8. Maximum amount that licensee may possess at any one time under this license

A. Any byproduct material with atomic number 3-83, or 95

A. Leak test samples

A. As needed

B. Any byproduct material with atomic number 3-83, or 95

B. Sealed sources which have been evaluated and approved by the Commission in accordance with 10 CFR 32.210 or an equivalent agreement State

B. No single source to exceed 0.1 millicurie. Total possession not to exceed 1.0 millicurie.

C. Cesium-137

C. Sealed sources (New England Nuclear Model Nos. NES-356, NES-357, NES-358, NES-359)

C. No single source to exceed 250 microcuries. Total possession not to exceed 1.0 millicurie.

D. Barium-133

D. Sealed sources (New England Nuclear Model Nos. NES-358 or NES-367)

D. No single source to exceed 300 microcuries. Total possession not to exceed 1.0 millicurie.

E. Technetium-99m

E. Any

E. 500 millicuries

9. Authorized Uses:

A. Possession incident to the performance of tests for leakage and/or contamination on sealed sources and devices containing licensed material.

Amendment No. 02

- B. through D. To be used for instrument calibration and testing.
- E. To be used for instrument calibration and testing for shielding evaluations.

CONDITIONS

10. A. Tests for leakage and/or contamination may be performed at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material. Analysis of leak test samples may be performed at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material.
- B. Licensed material listed in Subitems 6.B. through 6.D. may be used at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material.
11. Licensed material shall be used by, or under the supervision of, Sharon L. Long, David Close, Samuel A. Pontillo, Michael W. Lairmore and Kelly Stoneberg.
12. The Radiation Safety Officer for this license is Sharon L. Long.
13. A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed 6 months or at such other intervals as specified on the certificate of registration referred to in 10 CFR 32.210.
- B. In the absence of a certificate of a transfer indicating that a leak test has been made within 6 months prior to the transfer, sealed sources transferred from another person shall not be put into use until tested.
- C. Sealed sources need not be leak tested if they contain not more than 100 microcuries of beta and/or gamma emitting material, are in storage, and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

Amendment No. 02

- D. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.
- E. Tests for leakage and/or contamination shall be performed by the licensee or by other persons specifically licensed by the Commission or an Agreement State to Perform such services.
14. The licensee shall conduct a physical inventory every 6 months to account for all sources and/or devices received and possessed under the license.
15. Sealed sources containing licensed material shall not be opened or sources removed from source holders by the licensee.
16. The licensee is authorized to transport licensed material only in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
17. The licensee is authorized to hold radioactive material with a physical half-life of less than 120 days for decay-in-storage before disposal in accordance with the following conditions:
- A. Before disposal as ordinary waste, byproduct material shall be surveyed at the container surface with the appropriate survey meter on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.
- B. A record of each disposal permitted under this License Condition shall be retained for three years. The record must include the date of disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.
18. Licensed material shall not be used in or on human beings.
19. The licensee shall develop, maintain and implement procedures for obtaining an agreement with customers outlining the responsibilities of both the customer and service provider when performing service operations at customer's facility.

Amendment No. 02

20. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

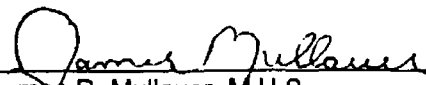

- A. Application dated July 1, 2005; and
- B. Facsimile dated September 1, 2005, with attached update dated August 30, 2005.
