Docket 50-263  
License No. DPR-22

Withdrawal of License Amendment Request for Establishment of an Emergency Service Water Technical Specification

By letter dated July 25, 2005, (L-MT-05-081) the Nuclear Management Company, LLC (NMC) requested U.S. Nuclear Regulatory Commission review and approval of a proposed license amendment request for the establishment of an Emergency Service Water (ESW) System specification within the Monticello Nuclear Generating Plant (MNGP) custom Technical Specifications.

On June 5, 2006, (ADAMS Accession Number ML061070577) the NMC received the MNGP Improved Standard Technical Specifications (ITS) conversion license amendment. The ITS include an Emergency Service Water system specification. The NMC has determined that the July 25, 2005, license amendment request to add an ESW System specification to the MNGP Technical Specifications is no longer necessary and is withdrawing the request.

A copy of this withdrawal letter is being forwarded to the designated Minnesota state official.

Summary of Commitments

This letter contains no new commitments and no revisions to existing commitments.
