RE: Closeout survey for Radioactive Materials License No. 37-12771-01  
The Chambersburg Hospital

Gentlemen:

We have decommissioned our long-term waste storage shed. All radioactive materials have been removed from the closet. The following is a closeout survey performed on June 12, 2006.

Gross contamination smears were taken on all walls and on the floor, door and doorknob. The smears were counted in a Capintec Captus 2000 well counter with an efficiency for TC-99m which is greater than 90% and minimum detectable activity of 255. Area radiation level surveys were taken at each smear site. The background for the area surveys was 0.02 mR/hr using a Ludlum 14C survey meter last calibrated on September 23, 2005. All readings were 0.02 mR/hr.

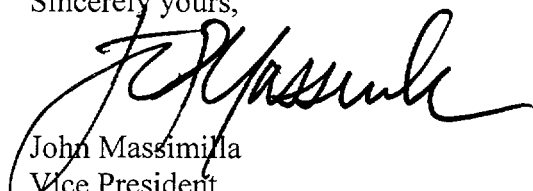

The following are the smear result. Background was 341 cpm. Gross smears were taken of all four walls, floor, door, and door handle.

Area #	DPM above background
--------	----------------------

Gross	-10
-------	-----

All radioactive material has been removed from the site and we have released the room for unrestricted use.

Sincerely yours,

  
John Massimilla  
Vice President  
Administration
