OED

release
Rick and Anne,
Bill Kane was interested in the NRC's posture or actions in 1998 and 2000 as a result of the vacuum breaker leaks and spills? I mentioned that I did not believe there were any 50.72's or violations, but could you let me know??

The second question Bill asked, what would be the normal NRC expectations with a spill of this magnitude as in 1998/2000....I think it would be good to compare what our actions were to recent issues such as Dresden.....
