Petersen

FYI - We are continuing to stay on top of the activities at Braidwood, as well as monitoring their efforts to characterize, understand and correct the tritium issue. We are also in regular communication with the State, specifically IEMA and IEPA and we have been and will continue to attend all of the appropriate meetings regarding this issue.

Subject: Kankakee IL Daily Journal stories on Braidwood tritium

Attached are a series of stories which appeared in the Kankakee Daily Journal, linking the tritium groundwater contamination to the earlier issues with the Village of Godley as a result of an oil spill. This stories are critical of the licensee's response, and suggests that information was available earlier about possible tritium contamination.
