Steve,

Your information looks good. I think it's an appropriate level of detail. The only change I made was to update the Braidwood write-up to include the information from yesterday. I'm now incorporating NMSS's fuel cycle data and will send you a copy of what we provide to the Chairman's office.

Thanks,
Beth

Attached is a file with historical knowledge from the four Regions and HQ staff.

I am available to discuss this information and the threshold levels used to filter it.
