Rick,
Appreciate the updates.....Commissioner Merrifield's office would like me to brief them by COB today on any updated status.....

A couple of areas that his office would be interested in if understood today...

1. Sample results of wells offsite
2. Configuration of vacuum breakers and release point to the field (appreciate our discussion, picture is a thousand words however)
3. Insights from our on-site inspector...

release
The commissioner would also like to be briefed next week sometime....Please let me know when a good time for this and I can work with Regional personnel to tie into the briefing.....

Thanks for consideration in this matter.....

OK - PMS
