No. NJDEP did not issue a violation because there was no tritium above the EPA standard offsite. They did work with PSEG to establish a remediation program. Discussions with some NJDEP staff indicates they may have issued a violation if it exceeded the criteria offsite. I saw the inside article and got a copy of the state's violation.

[ I am working with Region III on Braidwood. Illinois already issued a NOV for offsite AND ONSITE tritium

Ex 5

Thanks,
