SUBJECT: Class 1 Permit Modifications Request - # 2006-02
Hazardous Waste Facility Permit #: 04-BRK-09
Southern California Edison
San Onofre Nuclear Generating Station (SONGS)
EPA ID # CAD000630921

Southern California Edison – San Onofre Nuclear Generating Station provides notice to the public that on June 5, 2006, SONGS notified the Department of Toxic Substances Control (DTSC) of the Class 1 modification to incorporate the same three procedure revisions listed below into the Hazardous Waste Facility Permit (#04-BRK-09) and Operations Plan.

- (a) Procedure SO123-IX-2.206 entitled "Hazardous Material/Waste/Mixed Waste Inspections" and is part of SONGS' Environmental Procedure, Revision 8
- (b) Procedure SO123-XV-17.3 entitled "Spill Contingency Plan" (the Emergency Coordinators List) and is part of SONGS' General Procedure, Revision 7
- (c) Procedure SO123-IX-2.208 entitled "Hazardous Waste and Emergency Response Training Program", Revision 5

The Class I Modifications are based on Title 22, California Code of Regulations, Chapter 20, Section 66270.72 and Appendix I, Items A.1 and A.2, B.5.b and B.6.d.

The Class 1 modifications involves changes which are administrative and informational, such as, corrections of typographical errors and changes of names and phone numbers of coordinators or other persons identified in the procedures. The Class 1 Modifications do not increase the storage capacity or type of waste authorized at the existing hazardous waste management facility and do not require DTSC prior approval.
