RE: Richard Terry, M.D.
Approval of authorized user status

To Whom It May Concern:

This letter is to affirm that Dr. Richard Terry has received training and experience in nuclear cardiology under my preceptorship from January 2, 2006 through May 31, 2006 and has successfully completed the training program. Dr. Terry has completed no less than 700 hours of supervised classroom, laboratory, and clinical training. In his formal classroom instruction under the direction of Associates in Medical Physics, LLC, he has received 80 hours of instruction in radiation physics and instrumentation radiation protection, mathematics pertaining to the use and measurement of radioactivity, chemistry of by-product material from medical use, and radiation biology. These courses were attended February 21 through February 25, 2005, and September 9 through September 11, 2005. Course certifications are enclosed. In addition he has had extensive clinical experience in nuclear cardiology spanning 23 years of clinical practice where he was responsible for the clinical evaluation of patients including the appropriateness of nuclear cardiology testing, the review of results, and subsequent diagnostic and treatment decisions made based on that review. His five month preceptorship has involved determining appropriateness of studies, ordering the appropriate study, ordering the appropriate radio isotope dose, the performance of the stress test and pharmacologic stress test, the supervised interpretation of each of these studies, and correlation with subsequent cardiac catheterization data when available.

The content of his clinical experience has included:

- A. 300 rest SPECT myocardial perfusion images utilizing 99mTc Sestamibi.
- B. 300 stress SPECT myocardial perfusion studies utilizing 99mTc Sestamibi.

(continued)

- C. 296 EKG gated SPECT myocardial perfusion studies for wall motion analysis and ejection fraction.
- D. Has ordered and evaluated the results of numerous dual isotope studies using Thallium 201 and 99mTc over several years.
- E. Formal preceptorship supervision of indication, interpretation, and application of the results of 8 Thallium 201 myocardial viability studies.
- F. Ordering, interpretation, and making clinical correlation with numerous equilibrium gated blood pool radionuclide angiography studies over the years.

Dr. Terry's training was obtained at 111 Park View Lane, Suite 202, Wheeling, WV, at facilities license number 47-25637-01. Accordingly, he has had direct experience over two and a half years with ordering, receiving, and unpacking radioactive materials, direct experience with quality control checks of survey instruments, the use of calibration instruments, reviewing the proper operation of survey meters, administration of radio isotope utilizing a syringe shield, and has gained familiarity with the procedures for containing spills of by-product material, and proper decontamination procedures. He is well versed in ALARA standards.

In summary, I certify that Dr. Terry's total experience qualifies him as an authorized user under sections and paragraph 35.190 and 35.290 of the Nuclear Regulatory Commission Standards. He also fulfills the American Society of Nuclear Cardiology COCATS guidelines for training in nuclear cardiology.

If any additional information is required, please do not hesitate to contact me.

Sincerely,

John J. Wurtzbacher, M.D., FACC

RE: Amendment to license #47-25637-01

To Whom It May Concern:

Upon approval of Dr. Richard F. Terry's authorized user status, please amend our radioactive materials license to add Richard F. Terry, M.D. as an authorized user of materials to this license. Dr. Terry's training and experience in Nuclear Cardiology has exceeded the requirements as delineated in 10CFR35.290. A copy of our materials license and Dr. Terry's medical license is attached for your review.

Thank you for your attention in this matter.

13. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 10 CFR 30.35(d) for establishing decommissioning financial assurance.
14. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
15. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those procedures that are required to be submitted in accordance with the regulations. Additionally, this license condition does not limit the licensee's ability to make changes to the radiation protection program as provided for in 10 CFR 35.26. The U. S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
