Mr. Lawrence E. Nanney, Director
Division of Radiological Health
Department of Environment and Conservation
L & C Anne, Third Floor
401 Church Street
Nashville, TN 37243-1532

Dear Mr. Nanney:

By letter dated March 25, 2004, we sent you the results of our review of the final changes to the Tennessee regulations which were submitted to the NRC by letter dated February 19, 2004. These regulations were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) rules in 10 CFR Parts 30, 31, and 32, and the requirements of the General License (GL) amendment identified in the enclosed State Regulation Status (SRS) Data Sheet. The review we conducted omitted a specific review of Sections 10 CFR Parts 31.5 and 31.6. The text of these sections was not revised by the GL amendment, but the compatibility designations were changed from Compatibility Categories C and D respectively, to Category B.

As noted in All Agreement States letter STP-05-072, dated September 28, 2005, NRC staff will continue to review Agreement State GL Device proposed and final rules but will hold in abeyance any determination on those rules and compatibility of those rules, if the Agreement State has the essential elements of the NRC's rule and is more restrictive than the NRC's rule. For Agreement States without a GL Device rule or a GL Device rule less restrictive than the NRC rules, the staff will factor this determination into results of the NRC's review of the State's proposed and final rules and the compatibility findings during Integrated Materials Performance Evaluation Program (IMPEP) reviews.

Although we had only one comment for the 2001-1 amendment stated in the March 25, 2004 letter, as a result of our re-review against the Compatibility Category B designation, we have two additional comments that have been identified in the enclosure. We determined that Tennessee's GL amendment is less restrictive than the NRC's rule. We request that when a final amended version of Tennessee regulations is adopted and published in response to our comments, that a copy of the "as published" regulations be provided to us for review as requested in STP Procedure SA-201, Review of State Regulatory Requirements.

Please note that we have limited our review to regulations required for compatibility and/or health and safety. The SRS Data Sheet summarizes our knowledge of the status of other Tennessee regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hsrdo.org/nrc/rulemaking.htm>.
