RE: Radioactive Material License No. 47-17929-01  
Fairmont General Hospital  
Docket No. 03013661  
Control No. 138889

Mr. Kinley:

In response to your request for additional information:

a. Mark Perna has the full support of the management of Fairmont General Hospital in exercising control over the radiation safety program. He has the full support of management in exercising control over authorized users or any other persons when confronted with radiation safety problems that require the implementation of corrective actions.

b. Mr. Perna has the full support of management in pursuing all reasonable funds to facilitate the objectives of our radiation safety program and related regulatory requirements.

c. Mr. Perna is a medical physics consultant with accounts primarily located throughout Pennsylvania, West Virginia & Ohio. He expects to be routinely on-site an average of 4-5 hours per quarter. Given the small size of our Nuclear Medicine program, this is expected to be more than adequate to meet all of the NRC regulatory requirements. The radiation safety program is in excellent shape and is running very smoothly. In the unlikely event that any problems occur that cannot be handled by phone, e-mail or fax, Mr. Perna will return to handle them in a timely manner. He could be onsite in under 75 minutes.

d. Sandie Wells, Chief Nuclear Medicine Technologist, has been appointed in-house representative to Mr. Perna. She will serve as point of contact in Mr. Perna's absence.

e. Mr. Perna is generally available 24/7 by phone and slightly less so by e-mail.

If you have any questions or require additional information, please do not
