Title: Fee Billing Exception Reporting Process
Technical Monitor: Gordon Peterson: 301-415-7348
Designated Alternatives: Susan Jones: 301-415-6072

Background

The U.S. Nuclear Regulatory Commission (NRC) is required to recover a major portion of its annual budget. In order to implement this requirement, the NRC assesses fees in compliance with the Omnibus Budget Reconciliation Act of 1990 (OBRA-90), as amended, and the Independent Offices Appropriation Act of 1952 (IOAA). Fees are assessed as established in 10 Code of Federal Regulations (CFR) Part 170 and 10 CFR Part 171.

OMB Bulletin No. 01-02 requires managers of federal agencies to establish and maintain a system of internal controls designed to provide managers with reasonable assurance that the agency can achieve its objectives and goals. The FY 2005 audit identified internal control weaknesses related to the NRC fee billing process.

The Part 170 license fee filtering process classifies transactions as fee billable or non-fee billable according to the data type, the relationship between data elements, and program logic. For example, a transaction is rejected because it has a planned activity code (PA) that is incorrectly linked to a technical activity code (TAC).

Objective

The objective of this work order is to develop and implement one or more exception (i.e., error) reports for the Part 170 fee billing process. These reports will be used to identify transactions that are not selected as fee billable and to resolve any corresponding data errors during each quarterly Part 170 fee billing cycle.

Work Requirements

The contractor shall provide qualified personnel to complete the following tasks:

1. Identify and document the license fees Part 170 filtering process, as follows:
 - a. Include all filters applied by the HRMS/TL interface and the License Fee Reports System. The document shall be in sufficient detail to enable the LFT to develop programming specifications (e.g., include all data elements, corresponding criteria, etc.).
 - b. Classify all types of transactions that are rejected by the filtering process.

- c. Rank the types of transactions that are rejected for each classification by the level of risk associated with a potential error in the Part 170 fee billing process.
2. Develop a template (i.e., proposed layout) for one or more fee billing exception report(s) that identify high risk transactions rejected by the license fee filtering process and the reason those transactions were rejected.
3. Develop and document procedures for resolving the fee billing exceptions. The procedures shall identify the NRC office, division and team ultimately responsible for resolving the error.
4. Assist with preparation of a test plan to verify the accuracy of the report output, test the fee billing exception report(s) and document the results.

NOTE: The NRC acknowledges that Work Requirements 1-4 do not require an IT expertise
