Subject: Draft Special Permit for Shipment of Equipment Contaminated with Fissile Material
CC: Andrew Barto; Larry Campbell; rick.boyle@dot.gov; Robert Nelson

Mike:

Thank you for providing the Draft Special Permit by email dated 6/20/06. We recommend two additional conditions be included in Section 7(b). See below. In addition, the mass of U-235 in Section 2(a) should be revised from 350 g to 250 g, as specified in Section 7(a)(2).

Suggested additional conditions (add to Section 7(b) Operational Controls):

- (4) Equipment may be wrapped with polyethylene or other wrapping materials for contamination control.
- (5) Beryllium may be present but the quantity of beryllium shall not exceed 1% of the U-235 mass limit.

Please let me know if you have questions. Thanks, Nancy
