

August 28, 2006

Mr. Christopher M. Crane, President  
and Chief Executive Officer  
Exelon Generation Company, LLC  
AmerGen Energy Company, LLC  
4300 Winfield Road  
Warrenville, IL 60555

SUBJECT: BRAIDWOOD STATION, UNIT NOS. 1 AND 2; BYRON STATION, UNIT NOS. 1 AND 2; CLINTON POWER STATION, UNIT 1; DRESDEN NUCLEAR POWER STATION, UNITS 2 AND 3; LASALLE COUNTY STATION, UNITS 1 AND 2; LIMERICK GENERATING STATION, UNITS 1 AND 2; OYSTER CREEK NUCLEAR GENERATING STATION; PEACH BOTTOM ATOMIC POWER STATION, UNIT NOS. 2 AND 3; QUAD CITIES NUCLEAR POWER STATION, UNITS 1 AND 2; THREE MILE ISLAND NUCLEAR STATION, UNIT 1; AND ZION NUCLEAR POWER STATION, UNITS 1 AND 2 - USE OF PROTECTED TELECOMMUNICATIONS FOR TRANSMISSION OF SAFEGUARDS INFORMATION (TAC NOS. MD1498 THROUGH MD1514, L52684 AND L52685)

Dear Mr. Crane:

By letter to the Nuclear Regulatory Commission (NRC) dated March 24, 2006, AmerGen Energy Company, LLC and Exelon Generation Company, LLC (the licensees), submitted a request for approval to use Private1™ Model 960v telephone devices for the purpose of establishing protected telecommunications and transmitting encoded Safeguards Information (SGI) between authorized individuals over these devices. The National Institute of Standards and Technology's (NIST's) Certificate Number 108 shows that Private1™ Model 960v, software version 7.10 telephone device, complies with the Federal Information Processing Standards (FIPS) 140-1, "Security Requirements for Cryptographic Modules."

The NRC staff finds that the use of Private1™ Model 960v, software version 7.10 telephone device, is acceptable for processing and transmitting SGI electronically for Exelon and AmerGen sites provided that NIST-validated cryptographic algorithms are used to encrypt data for electronic transmission. These algorithms are listed in the certificate with the algorithm certificate numbers. The NIST website, <http://csrc.nist.gov/cryptval/140-1/1401val.htm>, should be checked to ensure that the cryptographic algorithms selected for encrypting data are continuously approved by NIST. The NRC approves only those cryptographic algorithms approved by NIST. Thus, if NIST no longer approves a certain cryptographic algorithm, then the NRC also does not approve the use of that cryptographic algorithm.

Title 10 of the *Code of Federal Regulations* (10 CFR) Section 73.21(g)(3) states, in part, ". . . Safeguards Information shall be transmitted only by protected telecommunication circuits (including facsimile) approved by the NRC." The NRC considers those encryption systems, that NIST has determined to be in conformance with the security requirements for cryptographic modules contained in FIPS 140-2, as being acceptable. The Secretary of Commerce has made

the use of cryptographic module validation program products mandatory and binding for Federal agencies when a Federal agency determines that cryptography is necessary for protecting sensitive information.

Additionally, in accordance with 10 CFR 73.21(a), you are required to establish and maintain an information protection system that satisfies 10 CFR 73.21(b) through (i). Compliance with the provisions of 10 CFR 73.21, including the use of encryption media for voice communications involving SGI, is mandatory and inspectible.

If you have comments regarding this matter, please contact the Exelon fleet project manager Maitri Banerjee at (301) 415-2277, or via email at [mxb@nrc.gov](mailto:mxb@nrc.gov).

Sincerely,

**/RA/**
