U.S. Nuclear Regulatory Commission
 11555 Rockville Pike
 Rockville, MD 20852-2738

Attn: Document Control Desk

Subject: Revised Schedule for Responding to the Second RAI for the Review of the
 NAC-MAGNASTOR System Application (TAC No. L23764)

Docket No. 72-1031

- References:
1. MAGNASTOR System – Application for Approval, NAC International, August 31, 2004
 2. Second Request for Additional Information for the Review of the NAC-MAGNASTOR System Application (TAC No. L23764), U. S. Nuclear Regulatory Commission (NRC), April 6, 2006
 3. Schedule for Responding to the Second RAI for the Review of the NAC-MAGNASTOR System Application (TAC No. L23764), NAC International, May 22, 2006

In response to the NRC's second request for additional information (RAI), dated April 6, 2006, for the review of the NAC-MAGNASTOR system application, we wish to inform you that due to the additional computer run time associated with the analyses, we will submit the RAI responses by August 28, 2006. Should progress on these analyses indicate the probability of completion by an earlier date, we will communicate with your office in a timely manner.

Our decision to perform the additional analyses is based on the proprietary technical discussions conducted during the July 6, 2006 closed meeting with members of the SFPO technical review team.

We appreciate the opportunity to provide the additional information requested by the NRC review staff and are looking forward to timely completion of the review and approval of the NAC-MAGNASTOR system application.

Should any member of the SFPO staff wish to discuss the above, please feel free to contact me at 678-328-1274.

Sincerely,

Anthony L. Patko
 Director, Licensing
