**Subject:** call from Bakken, PSEG,

He called me to tell me that in response to comments made by Dr Harvin at the our public meeting in mid-june, PSEG has hired Barry Letts to look into her assertions that others have been let go due to raising issues. Using UCS (Lochbaum) as a go-between, PSEG got four names (including one current NRC employee) of possible victims. Letts expects to investigate over the next month. Bakken said they would let us know of results or any major developments. (Of course, we knew much of this because of our employee, who consulted us after his first contact from PSEG about letts' review.)
