Subject: Comments on the Draft Supplemental EIS and Federal Consistency Certification
on the ESP for North Anna Nuclear Power Plant
cc: "Harry Ruth" <HC.RUTH@LOUISA.NET>

We wish to show our support of the questions raised by the Friends of Lake Anna regarding the proposed 3rd and 4th nuclear reactors at the Dominion power plant at Lake Anna.

We have become increasingly concerned about the high temperatures on the cooling lagoon side of the lake and of the potential of detrimental bacteria flourishing in the warm water. Our entire family uses the lake for recreation and we are especially concerned for the young children. A cap needs to be placed on the temperature in the cooling lagoons and enforced with penalties when it is exceeded.

The idea that the lake is treated as a waste treatment facility is ridiculous! The game warden told us that he patrols the private side of the lake. Game wardens do not patrol waste treatment facilities. We swim in these lagoons,,,many people swim in them,,,and they should certainly not be referred to as a waste treatment facility. They are public waters according to the game warden and should be labeled and then monitored in a way consistent with this.

The effect of the new reactors on the huge number of people now using the lake needs to be studied carefully. This lake is an area of recreation,,,it is advertised as such,,,and the safety and well being of those using it need to be considered.
