Subject: Comments on the Draft Supplemental EIS and Federal Consistency Certification on the ESP for North Anna Nuclear Power Plant

We wish to show our support of the questions raised by the Friends of Lake Anna regarding the proposed 3rd and 4th nuclear reactors at the Dominion power plant at Lake Anna.

We have become increasingly concerned about the high temperatures on the cooling lagoon side of the lake and of the potential of detrimental bacteria flourishing in the warm water. Our entire family uses the lake for recreation and we are especially concerned for the young children. A cap needs to be placed on the temperature in the cooling lagoons and enforced with penalties when it is exceeded.

The idea that the lake is treated as a waste treatment facility is ridiculous! The game warden told us that he patrols the private side of the lake. Game wardens do not patrol waste treatment facilities. We swim in these lagoons,,,many people swim in them,,,and they should certainly not be referred to as a waste treatment facility. They are public waters according to the game warden and should be labeled and

then monitored in a way consistent with this.

The effect of the new reactors on the huge number of people now using the lake needs to be studied carefully. This lake is an area of recreation,,,it is advertised as such,,,and the safety and well being of those using it need to be considered.

Dear Sir/Madam:

Thank you for your comments on the proposed Early Site Permit for the addition of third and fourth nuclear reactor units to Dominion Virginia Power Company's North Anna Power Station. This project proposal is the subject of two different review processes with two separate public hearings.

Please note that DEQ staff may **only** use the public comments made at the **Wednesday, August 16** hearing in developing its comments on the consistency of the proposed project with the enforceable policies of the Virginia Coastal Resources Management Program. DEQ staff may **not** use public comments made in the NRC hearing on August 15. However, DEQ staff will observe the NRC hearing. Similarly, NRC staff will observe the DEQ hearing on August 16.

DEQ Review Process

The process administered by DEQ is the federal consistency review process, mandated by the Coastal Zone Management Act (Spotsylvania County, which abuts Lake Anna, and the North Anna River are in Virginia's coastal zone). Our purpose is to evaluate, with the aid of public comments, whether the proposed project (including the new cooling system for the third unit) would, if licensed by the Nuclear Regulatory Commission, be consistent with the enforceable policies of the Virginia Coastal Resources Management Program. Pertinent details:

DEQ public hearing on federal consistency:

Wednesday, August 16, 2006

Time: 7:00 PM to 10:00 PM

Information session: 6:00 PM to 7:00 PM

Place: Louisa County Middle School, Mineral, Virginia

Conduct:

- DEQ hearing officer
- Statements by members of the public (time allotted to each speaker will be determined after sign-in)
- Questions and discussion **only** at information session

Deadline for additional written comments to DEQ on consistency:

September 8, 2006

Deadline for DEQ comments on consistency to Dominion and to NRC:

November 3, 2006

NRC Review Process

The process administered by the Nuclear Regulatory Commission (NRC) is the environmental impact review process mandated by the National Environmental Policy Act. The purpose of the NRC, in preparing the Supplement to the Draft Environmental Impact Statement, is to evaluate all environmental impacts associated with the new cooling method, with the aid of public comments, before making a decision on the Early Site Permit.

Again, the Early Site Permit, if issued by the Nuclear Regulatory Commission, would allow Dominion to reserve the site, undertaking studies and related construction and site preparation, while the company decides whether to apply for a construction and operating license for the new reactor units. Pertinent details relative to the NRC process:

NRC public meeting on environmental impacts:

Tuesday, August 15, 2006

Time: 7:00 PM

Information session: 6:00 PM

Place: Louisa County Middle School, Mineral, Virginia

Conduct:

- NRC hearing officer and other staff
- Statements by members of the public (typically 3-minute limit, additional material in writing)
- Questions and answers may be possible

Deadline for additional written comments to NRC:

August 25, 2006

I hope this information is helpful to you. Thank you for writing.

Sincerely,

Ellie Irons
