Subject: Re: Quality Assurance for aging management of NSR components

Jim,

Is that all you want me to put in section 3.0.4. Just two lines?

This is what will also go in the SER. The SRP write-up is pretty clear on what the reviewer should be looking for, specifically, is 10 CFR 50 App.B also used for non-safety related components?

LRA B.0.3, Confirmation Process, and Administrative Controls, the applicant states that "the Entergy QA program applies to safety-related structures and components." They do not make a similar statement in Corrective Actions.

Please confirm and I will incorporate the two lines in the new section 3.0.4. Do you have any references that you reviewed?

Erach

The project staff reviewed the applicant's corrective action procedure and found it to be acceptable. The corrective action procedure is reviewed on a routine basis by the regional inspection teams and has been found to be acceptable during past inspections.
