Re: Request for Material License Amendment
Expedited Review Requested

Dear Ms. Hersey:

On June 12, 2006 we were issued an NRC Material License (License No. 21-32621-01; Docket No. 030-37216). The license currently states that the authorized use of the source material is in Troxler Electronic Laboratories Model No. 3440 portable gauging devices. We would like to amend the license to authorize the use of all Troxler Electronic Laboratories Model 3400 series gauges. All of the Model 3400 series gauges contain the same sources and amount of sources (Americium-241, 44 millicuries and Cesium-137, 9 millicuries). We will maintain less than ten (10) gauges in our possession at any time unless we apply for an amendment to the license. Due to an accelerated project schedule, we are in need of the gauges very soon, therefore we are requesting an expedited review of this application amendment.

We sincerely appreciate your timely review of this license application amendment. Please feel free to call myself at (574) 243-7687 with any questions regarding this application.

Sincerely,

Cornerstone Environmental Group, LLC
