Dear Mr. Walt:

On May 19, 2006, the NRC completed the onsite portion of an inspection at your H. B. Robinson reactor facility. Portions of inspection procedures 71130.01, Access Authorization, and 71130.08, Fitness for Duty, were completed at the Carolina Power & Light Corporate Office on February 10, 2006. The enclosed report documents the inspection findings, which were discussed with Mr. E. Martin, at the corporate office, on February 10, 2006, and with Mr. C. Baucom, and other members of your staff on May 19, 2006. A re-exit was conducted on June 13, 2006, with Mr. G. Sanders, and other members of your staff.

This inspection examined activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

Based on the results of this inspection no findings of significance were identified.
