Subject: RE: Financial Assurance and Decommissioning Funding

Here's the list that Tim sent to me:

ICF and I have the following comments on the July 21 revisions to the DFP:

1. The proration process used in Table C3.14 should be explaining and the numerical factors justified. We assume that this is used only in computation of the contractor profit.
2. In Table 3.17 for indirect costs, there is a line item for taxes but no cost entry. Is something missing?? Also, why isn't business insurance also deducted in the contractor profit calculation?
3. The assumption in the fourth bullet for Table C3.18A is unclear. We could not follow how the computation for the labor and materials costs was made.
4. It appears that there is a typo in the Table C3.19A assumption describing how R2 is calculated. It appears that some of the terms should be subtracted rather than added.
5. On p. C-4, Note 1, the number of contaminated spare centrifuges is listed as 400. However, on Table 10.2-1, it is listed as 480. Which number is correct??
6. We assume that the some information in Table C3.14 is based on design information and cost information from USEC GDP operations. If so, can this be stated??
7. In Table C3.16 under Laboratory Costs, there are no transportation costs. We assume that it is intended that the on-site lab will be used and will be operational even if a third-party contractor is used for the decommissioning work.

Thank you. I will be in touch with Tim for the call. Do we know the specific questions or issue(s)?

Subject: Financial Assurance and Decommissioning Funding
Dave,

I will be out of the office on Monday (Aug. 7, 2006). Let Tim Johnson (301-415-7299) know when you'd like to have that teleconference with the financial people... he'll arrange things on our end.

Thanks,

JD
