**Subject:** ESP at the North Anna Site

Sir/Madam:

I would like to indicate my support for a favorable ruling for the Early Site Permit at the North Anna Site. I have a home on Lake Anna about 10 miles away from the present plant and do not consider the present plant or the addition of two more units to be a hazard to this region. I must say that with the rising cost of electricity and the need to produce more, the way to go now is nuclear. To replace the added capacity that nuclear can provide with coal should be out of the question, what with the additional CO<sub>2</sub> and hydrocarbons put in the air we have to breath. Thank you for your time.

Kindly,

C. Sherman Frye  
Associate Professor of Physics, Retired  
Northern Virginia Community College
