Subject: Salem Unit 2 Draft NOV - Unauthorized FWP Steam Admission Valve Operation *U*

Appended is the revised draft NOV. The basic premise of the original draft was preserved in that the actions of [REDACTED] adversely impacted the command and control responsibilities of the operating shift. A CFR reference was added to emphasize that consent of the operator at the controls must first be obtained before operating certain plant equipment. Thanks to Dan Holody and Karl Farrar for their help with this issue. *720*

This draft NOV will provide a baseline reference of [REDACTED] and should not be discussed outside NRC.

CC: A. Randolph Blough; Daniel Holody; Daniel Orr; David Vito; Eileen Neff; Ernest Wilson; George Malone; Jeffrey Teator; Karl Farrar; Leanne Harrison; Sharon Johnson
