SUBJECT: CONVERSATION WITH CI ON STATUS OF HIS TECHNICAL CONCERNS

I spoke with Mr. Kenneth Bowers the CI of RII-2005-A-0056 and RII-2005-A-0115. Mr Bowers called me on October 26, 2005, to ask the status of his concerns. I advised him that the only open concerns he had were being review by NRC OI as ADR had been declined by FPL. I gave him contact information for OI. He called Cheryl Montgomery October 27, 2005, and she advised him that he would have to be willing to sit down with an agent and give a statement for his concerns to be further investigated. He advised that he was without an attorney and was reluctant to give a statement to OI without representation. He also told Ms. Montgomery that I had told him I would call back with a status of his technical issues.

I call the CI back and had a prolonged conversation where he reiterated the details that he had previously provided to Joel Munday. I again advised him that his technical concerns had not been substantiated and he had not provided new information on the technical issues. I reiterated that the only new information he had provided was to Joel Munday and was the "conspiracy to fire him" (see file for details) information. I urged him to speak with an OI agent as instructed to him by Ms. Montgomery.

He became hostile and accused all parties of involvement in a cover up ploy with Florida Power and Light and stated he would seek an independent investigation from the FBI or IAEA. I ended the conversation.
