SUBJECT: KEWAUNEE POWER STATION - CORRECTION OF AMENDMENT  
RE: SURVEILLANCE INTERVAL EXTENSION (TAC NO. MC9782)

Dear Mr. Christian:

On July 12, 2006, the Nuclear Regulatory Commission (NRC) issued Amendment No. 187 to Facility Operating License (FOL) No. DPR-43 for Kewaunee Power Station, to revise the FOL by adding a license condition to extend certain technical specification surveillance requirements on a one-time basis to account for the effects of an extended forced outage in the spring of 2005.

Due to an administrative error, the FOL pages were issued without amendment No. 187 typed at the bottom of the page. Enclosed are the revised FOL pages with the issued Amendment number.

The NRC staff regrets any inconvenience this error may have caused you. Please feel free to contact me at 301-415-1439 if you have any questions.

Sincerely,
