Response Letter dated October 22, 2005

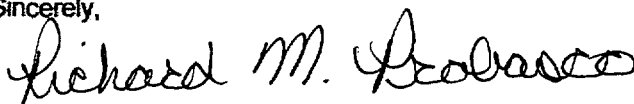

Your Letter of Response dated January 24, 2006

Dear Mr. Collins:

In accordance with the referenced documents, the actions discussed in the Confirmatory Order, Section V, Item 1 have been addressed. Specifically I have completed the last remaining action on June 28, 2006. I made a presentation to the Professional Reactor Operator Society explaining the lessons learned over the past two years. I presented some methods to help prevent getting into a Fitness for Duty situation and stressed making sure incidents get reported correctly in accordance with station procedures. I also made myself available to discuss the incident with any of the members that did not attend the annual meeting.

Please feel free to contact me if there are any questions.

Sincerely,

Richard M. Probasco
