

NRC FORM 699 (9-2003)		U.S. NUCLEAR REGULATORY COMMISSION		DATE <b>08/01/2006</b>
<b>CONVERSATION RECORD</b>				TIME <b>1:00pm</b>
NAME OF PERSON(S) CONTACTED OR IN CONTACT WITH YOU <b>Evan Rosenbaum, Stephan Anton, Indresh Rampall</b>		TELEPHONE NO. <b>856-797-0900</b>		TYPE OF CONVERSATION <input type="checkbox"/> VISIT <input type="checkbox"/> CONFERENCE <input checked="" type="checkbox"/> TELEPHONE <input type="checkbox"/> INCOMING <input checked="" type="checkbox"/> OUTGOING
ORGANIZATION <b>Holtec International</b>				
SUBJECT <b>License Amendment Request 3 - Clarification of Thermal Issues</b>				
SUMMARY (Continue on Page 2)				
NRC Attendees: Christopher Regan, Jorge Solis, Larry Campbell				
NRC Called Holtec International to request clarification of Holtecs July 10, 2006, response to the June 6, 2006, staff Request for Additional Information pertaining specifically to the thermal discipline.				
The staff raised concerns regarding the application of the wall shear stress methodology used by Holtec. Specifically Holtecs approach for developing the wall shear stress using specific points. The staff questioned Holtec why this approach was a realistic reflection of the whole region and why use of the average of the selected points appropriate. The staff contends that an area weighted average for developing the wall shear stress would be a more accurate representation of the dynamics occurring in the region.				
NRC asserted that using the staffs area weighted average approach in determining the wall shear stress values would address the concern. Holtec agreed to consider this approach but cautioned the staff that implementing the staff proposed revised methodology could result in a significant reanalysis and resultant delays in obtaining design approval.				
The conference call was terminated due to time constraints but it was agreed that the discussion would be reconvened the next day 08/02.				
The NRC did not request or expect any information from Holtec as a result of this conference call.
