

August 31, 2006

Mr. Philip N. McCullough, Vice President
Training and Accreditation
Institute of Nuclear Power Operations
700 Galleria Parkway, N. W.
Atlanta, GA 30339-5957

Dear Mr. McCullough:

Enclosed with this letter is the Annual Report on the Effectiveness of Training in the Nuclear Industry for Calendar Year 2005. This report is based on the NRC's (1) review of training-related issues derived from Human Factors Information System data, (2) observations of the INPO accreditation process, (3) conduct of a for-cause training inspection, and (4) review of the results of operator licensing inspection and oversight activities. The report concludes that accredited training programs continue to meet the systems approach to training requirements contained in 10 CFR Parts 50 and 55. Although NRC monitoring has provided some evidence of weaknesses in training, overall, all indicators suggest that the industry is implementing training programs in accordance with the regulations.

If you have questions on any of the topics discussed in this report please contact me at (301) 415-1004 or Ms. Nancy Salgado of our Operator Licensing and Human Performance Branch at (301) 415-2942.

Sincerely,

/RA/ Patrick L. Hiland for

Michael J. Case, Director
Division of Inspection and Regional Support
Office of Nuclear Reactor Regulation
