PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as a means to facilitate an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge Virginia Department of Environmental Quality to grant Coastal Zone Certification for Dominion's Early Site Permit.

- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as a means to facilitate an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge Virginia Department of Environmental Quality to grant Coastal Zone Certification for Dominion's Early Site Permit.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as a means to facilitate an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge Virginia Department of Environmental Quality to grant Coastal Zone Certification for Dominion's Early Site Permit.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals, many of us being customers and shareholders of Dominion Resources, as well as residents of Louisa County or other areas neighboring the North Anna site, SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as the means to guarantee an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge the Virginia Department of Environmental Quality and other associated Commonwealth agencies to endorse the project as consistent with the Virginia Coastal Resources Management Program.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as a means to facilitate an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge Virginia Department of Environmental Quality to grant Coastal Zone Certification for Dominion's Early Site Permit.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals, many of us being customers and shareholders of Dominion Resources, as well as residents of Louisa County or other areas neighboring the North Anna site, SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as the means to guarantee an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge the Virginia Department of Environmental Quality and other associated Commonwealth agencies to endorse the project as consistent with the Virginia Coastal Resources Management Program.

- We support the ESP process as a means to facilitate an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge Virginia Department of Environmental Quality to grant Coastal Zone Certification for Dominion's Early Site Permit.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as a means to facilitate an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge Virginia Department of Environmental Quality to grant Coastal Zone Certification for Dominion's Early Site Permit.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals, many of us being customers and shareholders of Dominion Resources, as well as residents of Louisa County or other areas neighboring the North Anna site, SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as the means to guarantee an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. **Nuclear Regulatory Commission** to GRANT Dominion's application for an Early Site Permit. We urge the **Virginia Department of Environmental Quality** and other associated Commonwealth agencies to endorse the project as consistent with the Virginia Coastal Resources Management Program.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals, many of us being customers and shareholders of Dominion Resources, as well as residents of Louisa County or other areas neighboring the North Anna site, SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as the means to guarantee an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. **Nuclear Regulatory Commission** to GRANT Dominion's application for an Early Site Permit. We urge the **Virginia Department of Environmental Quality** and other associated Commonwealth agencies to endorse the project as consistent with the Virginia Coastal Resources Management Program.

PETITION SUPPORTING DOMINION'S NEW NUCLEAR REACTORS AT NORTH ANNA

We, the undersigned individuals SUPPORT plans by Dominion to secure an Early Site Permit (ESP) to construct new nuclear reactors at its North Anna facility, on the following grounds:

- We concur with the NRC's conclusion that environmental impacts would not prevent issuing an ESP for the North Anna site.
- We believe that nuclear energy is safe, clean, reliable and cost effective, and as such, it should continue to be an important part of a balanced energy mix.
- We support the ESP process as a means to facilitate an open and thorough evaluation of future nuclear projects, while ensuring the timeliness and predictability of the process.
- We commend Dominion for being proactive and farsighted when looking for reliable methods of addressing expected increases in energy demand over the coming years, while minimizing the environmental footprint of the selected energy sources, as well as the economic burden to Dominion customers.

Therefore, we urge the U.S. Nuclear Regulatory Commission to GRANT Dominion's application for an Early Site Permit. We urge Virginia Department of Environmental Quality to grant Coastal Zone Certification for Dominion's Early Site Permit.
