Mr. Duncan White
NRC Region I
475 Allendale Road
King of Prussia, PA 19406-1415

Dear Mr. White:

RE: Program Improvement Plan - Update # 2

Enclosed is the second update of our Program Improvement Plan, submitted as required by the heightened oversight process. The following are our accomplishments since our update of July 19, 2006:

- We have completed Milestone 1.2. The Rulemaking Initiation Memorandum was signed by Commissioner Sheehan on June 23, 2006.
- We have completed Milestone 2. The scoping meeting was held on July 13, 2006. Participants included the Governor's Office of Regulatory Reform (GORR), the Department's Division of Environmental Permits (DEP), our Division's regulatory coordinator, and myself. The purpose of the meeting was to inform GORR of our schedule, the general scope of the rule, and our plans for outreach to affected parties. We also discussed with DEP the steps required under our State Environmental Quality Review Act.
- We are making progress on Milestone 5.1, Express Terms. Our rulemaking will consist of amendments to Part 380 and adoption of a new rule, Part 384. The latter will be compatible with the License Termination Rule. We have produced preliminary drafts of the revised Part 380 and the new Part 384. These are undergoing further review and revision by radiation program staff.
- We have begun drafting Milestone 5.4, the Regulatory Impact Statement. This document provides the foundation for the other impact assessment documents (Milestone 5.5, the Regulatory Flexibility Analysis, Milestone 5.6, the Rural Area Flexibility Analysis, and Milestone 5.7, the Job Impact Statement).

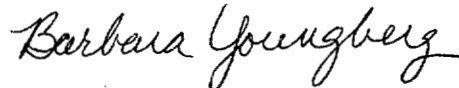

- We have changed the expected completion date for Milestone 3, Outreach to Affected Parties, from August to September 2006. We are also reconsidering the form that the outreach will take. There are many acceptable avenues for collecting input from affected parties, and we are evaluating which is most appropriate and efficient for Part 380 and Part 384. Therefore, some of the details presented previously have been deleted.
- We have expanded Milestone 4, NRC Review, to present both the date we will send the draft rule to NRC and the date when NRC will send us their comments. We intend to send the preliminary draft rule to the NRC in October.

The rest of the plan remains the same, and our completion date has not changed.

As we explained in our January 31, 2006 letter, we recognize the need to adopt these regulations, but our delay in doing so has not impaired DEC's ability to protect the environment or the public from radiation hazards.

If there are any questions on our updated plan, please contact me.

Sincerely,

Barbara Youngberg
Chief, Radiation Section

Enclosure
