Attention: Richard McKinley

Control #: 139207

Dear Mr. McKinley:

The American Board of Radiology certifies Dr. Barry Franklin in Diagnostic Radiology. He has worked at Newton Memorial Hospital for over twenty years. He has participated as a member of the radiation safety committee for at least the last two years.

Dr. Franklin has been involved in all aspects of the Radiation Safety Program, and I feel he has achieved a level of radiation safety knowledge sufficient to function independently as a Radiation Safety Officer at Newton Memorial Hospital.

Sincerely,

Dr. Fred Corio
Chief Radiologist
