Subject: Need to resign Motion-URGENT

Importance: High

We received the Petition to Extend Time for Filing. You dated it in two places but did not sign it. The case is set for hearing on closing the estate. If the Petition and Order are not approved by the Court, the estate could be closed or you could be removed as PR, or face additional sanctions. Thus, time is of the essence.

I'll attach the Petition again. Please sign and date it and overnight it.

Subject: Hope Creek Maintenance Outage Extended

Hope Creek Maintenance Outage Extended

D/E:
This is the
issue addressed
on the 3/19 and
3/27 [REDACTED]
transcripts.

Our maintenance outage at Hope Creek has been extended. The unit was reconnected to the grid on Friday evening, just before 10:00 pm, completing the seven-day outage. During the planned outage, all the work that was anticipated had been completed and we were prepared to bring the unit back to full power operation.

P-2

To transition back to full power, Main Steam bypass valves that are opened when the unit is in Mode 1 but not connected to the grid, are closed so that steam can be directed to the main turbine. This is a normal process that occurs following every restart. One of nine bypass valves failed to close, which forced us to take the unit off line and investigate.

The unit was taken off line yesterday afternoon. Following the reactor scram, the bypass valve that remained in the open position did not close. A team has been assembled to understand why the valve behaved in this manner and take the appropriate corrective actions. Once these actions have been taken, the unit will be brought back to service.

Subject: Program comments from last week

Dear Kymn:

Thanks so much for your help last week. I look forward to seeing you again soon.

The attached Program Comments reinforce the positive evaluations you received Tuesday. [REDACTED] and I were delighted with everyone's progress--particularly [REDACTED]. [REDACTED] also worked very hard to master our techniques, which is tougher when you're an experienced presenter!

Take care,
[REDACTED]
