Peter,

While reviewing the draft audit and review report, the following needs closure:

Section 3.0.3.1.1.2 - Second paragraph has a future action. You state:

During the audit and review, the project team noted that the applicant's LRPD-02, Section 4.1 did not distinguish the Boron-10 Areal Density Gage for Evaluating Racks (BADGER) test from the blackness testing. The project team asked the applicant to clarify that the BADGER test used in PNPS is an areal density measurement. The applicant responded that its LRPD-02, Sections 4.1.B.2b and 4.1.B.4b will be revised to clarify that BADGER test is an areal density measurement.

Did you verify during the second site visit that LRPD-02 was revised? If so, I need a positive statement to close out this item. As written, it is an open item.

Please give me the appropriate words.

Erach
