Log # TXX-06148

September 5, 2006

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 AND 50-446
SUPPLEMENT TO LICENSE AMENDMENT REQUEST (LAR) 05-
010 AND RESPONSE TO REQUEST FOR INFORMATION
(TAC Nos. MC9494 and MC9495)

- REF: 1. Letter logged TXX-05199, dated December 16, 2005 from Mr. Mike Blevins of TXU Power to the NRC
2. Letter logged TXX-06097, dated June 26, 2006 from Mr. Mike Blevins of TXU Power to the NRC
3. Letter logged TXX-05162, dated August 25, 2006 from Mr. Mike Blevins of TXU Power to the NRC
4. Letter Logged TXX-05162, Dated September 1, 2005 from Mr. Mike Blevins of TXU Power to the NRC

Gentlemen:

In Reference 1, TXU Generation Company LP (TXU Power) requested an amendment to the CPSES Unit 1 Operating License (NPF-87) and CPSES Unit 2 Operating License (NPF-89) to revise Technical Specifications 3.3.2, 3.5.2, and 3.6.7 entitled "ESFAS Instrumentation," "ECCS-Operating," and "Spray Additive System," respectively, in the CPSES Units 1 and 2 Technical Specifications (TS). TXU Power supplemented the License Amendment Request via Reference 2 and Reference 3. This proposed License Amendment was requested to support resolution of Generic Safety Issue (GSI) 191 pursuant to the requirements of NRC Generic Letter 2004-02 as described in Reference 4.

During an August 28, 2006, teleconference with the NRC, TXU Power discussed the requested information provided in letter logged TX-06144 (Reference 3). TXU Power would like to clarify and correct TXU Power's description of the NRC discussion regarding the retention of the existing Technical Specification 3.6.7 Surveillance Requirements. In Reference 3, TXU Power stated, *"During this teleconference, the NRC informed TXU Power that they would require retention of the existing Technical Specification 3.6.7 Surveillance Requirements."*

TXU Power would like to replace the above sentence in Reference 3 with, *"The NRC informed TXU Power that, given the current state of testing chemical effects for different buffering agents, the Staff believes it is still appropriate to specify both the particular buffering agent along with specific Surveillance Requirements associated with the buffering agent in Technical Specification 3.6.7. Therefore, TXU Power has decided to retain the existing Technical Specification 3.6.7 Surveillance Requirements for sodium hydroxide (NaOH) until additional analysis can be performed and a new license amendment can be prepared and submitted."*

In accordance with 10CFR50.91(b), TXU Power is providing the State of Texas with a copy of this proposed supplement.

This communication contains no new licensing basis commitments regarding CPSES Units 1 and 2.

Should you have any questions, please contact Mr. J. D. Scawright at (254) 897-0140.

I state under penalty of perjury that the foregoing is true and correct.

Executed on September 5, 2006.

Sincerely,

TXU Generation Company LP
