Corporate Effects will provide expertise to review the current state of affairs (per WANO evaluation, 2003-7 Business Plans, NRB minutes etc), and provide a proposal for going forward. The requested amount is seed money for the development of prioritized long-term maintenance excellence plans based on what has worked at current WANO 1 plants with less than average prior performance.

Focus on the Increase Maintenance Productivity business plans, and provide expertise to the effectiveness of the proposed actions. Review what actions actually worked at other turn-around plants. Provide estimates for future (e.g. six months) Corporate Effects level of effort to 1) develop new tasks and 2) prioritize all new and existing maintenance productivity and work management efficiency business plan tasks and re-align resources, if necessary. Mr. Pedersen will develop the thumbprint for what the results of the maintenance business plan, and will help the Director-Production maintenance instill the vision of a robust maintenance organization.
