Subject: aircraft specific information related to Pa'ina irradiator

Mr. Schlapak,

As you know we are currently performing a licensing review of Pa'ina Hawaii's proposal to place an irradiator at the Honolulu International Airport. To address concerns of local citizens we are analyzing potential impacts from an aircraft crash. In order to complete this analysis we need certain information relating to the types of aircraft, and the numbers of takeoffs and landings at each runway. Details are provided in the attachment. (NOTE: Mr. Kohn has provided a response for Question 1, we are looking for assistance for Questions 2 and 3.)

If the specific information is not available from you or someone at the airport, we will have to use more conservative estimates in our analysis. If possible can you please provide us with a name and contact information for appropriate personnel at the airport with whom we can coordinate. Please call or email if you have any questions or concerns.
