DOCKETED
USNRC

January 23, 2007 (4:30pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

To whom it may concern,

In order for the NRC to most adequately address its mandate to address safety concerns at the nation's nuclear reactors, I ask that you approve the petition for rulemaking ,docket PRM-51-11,that would improve radiation protection standards at old reactors.

I am aware that no one in the NRC likely believes there is such a thing as an old reactor otherwise you would be less than prudent to approve license extensions on these reactors.

I too am aware that the Beir data available at the time of the crafting of NUREG 1437 (GEIS) has been supplemented and/or corrected and therefore I urge you to approve this petition for rulemaking.

Sincerely,
Gary Sachs
Brattleboro, VT 05302
