Subject: Docket No. PRM-51-10 – Support The Massachusetts Attorney General's Petition for Rulemaking- Spent Fuel

Secretary, U.S. Nuclear Regulatory Commission,
Washington, DC 20555-0001

Attn: Rulemakings and Adjudications Staff.

RE: Docket No. PRM-51-10 – Support The Massachusetts Attorney General's Petition for Rulemaking- Spent Fuel

I support the Massachusetts Attorney General's Petition for Rulemaking in its entirety.

Due to new information, the Nuclear Regulatory Commission should recognize that the License Renewal GEIS is incorrect in its characterization of the insignificant environmental impacts of spent fuel storage. The NRC should evoke the regulations that excuse consideration of spent fuel storage impacts in NEPA decision-making documents, and issue a generic determination that the environmental impacts of high-density pool storage of spent fuel are indeed significant. Any NRC licensing decision that approves high-density pool storage of spent fuel at a nuclear power plant or any other facility must be accompanied by an EIS that addresses the environmental impacts of high-density pool storage of spent fuel at that nuclear plant and a reasonable array of alternatives for avoiding those impacts.

This rule change is important to protect public health and safety.
