RE: Docket No. PRM-51-10 - Support The Massachusetts Attorney General's
Petition for Rulemaking- Spent Fuel

I support the Massachusetts Attorney General's Petition for Rulemaking.

Specifically we support the Attorney General's position that the Nuclear
Regulatory Commission should:

(a) Consider new and significant information showing that NRC incorrectly
characterized the environmental impacts of spent fuel storage as
insignificant,

(b) Revoke the regulations which codify that incorrect conclusion and excuse
the NRC's failure to consider spent fuel storage impacts in the licensing
process,

(c) Issue a generic determination that the environmental impacts of
high-density pool storage of spent fuel are significant, and

(d) Order that any NRC licensing decision that approves high-density pool
storage of spent fuel at a nuclear power plant or any other facility must be
accompanied by an EIS that addresses (i) the environmental impacts of
high-density pool storage of spent fuel at that nuclear plant and (ii) a
reasonable array of alternatives for avoiding or mitigating those impacts.

Template = SECY-067

SECY-02

We know that this rule change is important to better protect the Commonwealth's public health and safety and that new and significant information, e.g., the events of 9/11 and the President's statement that nuclear power plants are on terrorist's lists, has evolved since the rule was written.

Very truly yours,
Millie Morrison
