SUBJECT: District Hospital Partners, L.P.
D/B/A The George Washington University Hospital
Request for Amendment to our Material License

REFERENCE: NRC License No. 08-30607-01
Docket No. 030-35424

RECEIVED
REGION 1
2007 JUN - 8 AM 10: 43

Dear Ms. Lanzisera:

This letter is for removal of the "10 mg" Cs-137 sealed source from our license that was inadvertently listed in Items 5.1 (a) of our license application. This particular Cs-137 source has never been in inventory of our hospital license.

During the recent NRC inspection of our facility on May 29/30, 2007, the NRC inspector and the RSO conducted a thorough check of the inventory and confirmed all the sources that have been listed in the inventory. A diagram drawn in January 1993, posted on the wall and inside the lead cabinet indicates the location of all the sources in the cabinet including Cafritz "10 mg" Cs-137 source. In addition, our old record indicates that this particular source identified as Cafritz "10mg" source # 4-66 was retired from active duty and was removed from inventory on December 18, 1986, by Dr. Ellen D. Yorke (Attachment-I). Furthermore, on February 3, 1987, the then Radiation Safety officer of the George Washington University Dr. Mark Selikson, transferred the source to the Radiation Safety Office for subsequent disposal (Attachment-II).

If you have any questions, please contact Anisuzzaman Chowdhury, Ph.D. at 202-715-4959. He can be paged by dialing 1-877-475-8994.

Sincerely,

Trent Crable
Chief Operating Officer

Mark Selikson, Ph.D.
Radiation Safety

FROM: Ellen D. Yorke, Ph.D. *Ellen D. Yorke*
Division of Radiation Oncology & Biophysics

DATE: December 18, 1986

SUBJECT: Cs-137 Source

Due to a 7% discrepancy between the nominal and measured values of its activity, Cafritz Cs-137 source #4-66 is being retired from active duty (see Cesium Log, p. 132). This source has not been used for several years. It is being placed in a separate cannister in the radium room safe pending disposal by Radiation Safety.

THE GEORGE WASHINGTON UNIVERSITY
INTERDEPARTMENTAL MEMORANDUM

MEMO TO: DR. CHARLES ROGERS
DIRECTOR
DIVISION OF RADIATION ONCOLOGY

FROM: DR. MARK SELIKSON *MS.*
DIRECTOR
RADIATION SAFETY OFFICE

DATE: FEBRUARY 3, 1987

RE: REMOVAL OF CS-137 SOURCE

Today the Cafritz Cs-137 source #4-66 ("retired" as per Dr. Yorke's memo of Dec. 18, 1986) was removed from the radium room safe and deleted from your inventory. The source removal and transfer to Radiation Safety Office are now complete.
