King of Prussia, PA 19406

Dear Mr. Lawyer,

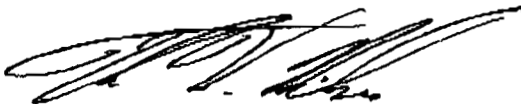

I am writing to further clarify the usage of long-lived radiol isotopes at our 4170 City Ave. facility.

- 1) <sup>14</sup>C was not used at this facility.
- 2) <sup>3</sup>H was only used in Room 316 (Laboratory) and Room 319 (Darkroom).
- 3) Room 319, the darkroom, is very small – only about 6 ft by 8 ft and was only used for developing autoradiograms – hence the close-out survey was small.
- 4) <sup>3</sup>H purchase & disposal records will be provided at the termination of the license.

Thank you for your diligence and attention to our license amendment.

Please call with any questions / comments.

Sincerely,

Thor W. Nilsen
