ENVIROMENT, SAFETY, HEALTH &
SAFEGUARDS

SECTION:

NUCLEAR MATERIALS CONTROL

Message:

Brian,

As discussed with you earlier today on the phone, BWXT would like to confirm an IAEA representative's authorization to participate in an IAEA inspection at the BWX Technologies IAEA Safeguarded Downblending Facility. Per Rastislav Hajdusek, an IAEA employee that has not visited our facility in the past, will be visiting the BWX Technologies IAEA Safeguarded Downblending Facility possibly during the January inspection. The name provided to BWXT during the October inspection was Rengarajan Govindaraj. Rastislav stated this would be the IAEA Technician taking Junichi Tanakas' place during future IAEA inspections at the BWX Technologies IAEA Safeguarded Downblending Facility.

Feel free to call me at ext. 6734 if you have any questions concerning this matter.

Thank you,

Chris
